

**HAS AN IMMEDIATE FULL TIME JOB OPENING IN THE PANGUITCH
FOR A CENTRAL OFFICE/NETWORK TECH:**

We are looking for a team player whose responsibilities will include installing, maintaining, and testing all types of Central Office landline, fiber optic, and wireless facilities, toll and subscriber carrier systems, and associated electronics. Ensure service delivery by maintaining operational status and security of the Internet Protocol (IP) Network and related equipment. This individual will take direct responsibility and maintain, monitor, backup, configure, and secure systems operating at layers 2 through 6 of the OSI model. Will deploy and integrate new systems and services as required. Monitors quality of toll, extended area service (EAS), special circuits, and other subscriber carrier facilities. Takes trouble reports and clears trouble. The successful candidate must be experienced in computers and networking and be customer service oriented. Network certifications, Cisco, Calix, Ciena, and Metaswitch experience a plus. Great benefit package.
